

Defeating Putin and Saving the Planet: How the Navy Can Lead the Way

The United States Navy is the most powerful naval force in the world. It has a long and proud history of defending our country and our allies. But in recent years, the Navy has faced new challenges, including the rise of Russia and China, and the growing threat of climate change.

In his new book, *How the Navy Can Defeat Putin and Halt Climate Change*, former Navy Secretary Ray Mabus argues that the Navy has a vital role to play in addressing these challenges. Mabus served as Navy Secretary from 2009 to 2017, and he is a leading expert on naval affairs. In his book, Mabus provides a blueprint for how the Navy can use its unique capabilities to defeat Putin and halt climate change.

Defeating Putin

Putin is a dangerous dictator who poses a grave threat to the United States and our allies. He has invaded Ukraine, annexed Crimea, and interfered in our elections. He is also developing new weapons, including nuclear weapons, that could threaten our security.

The Navy can play a vital role in deterring Putin and defeating him if he decides to attack. The Navy's ships, submarines, and aircraft can be used to blockade Russia, patrol the Baltic and Black Seas, and conduct strikes against Russian forces. The Navy can also provide support to our allies in Europe, who are facing Russian aggression.

Halting Climate Change

Climate change is the greatest threat facing our planet. The effects of climate change are already being felt around the world, in the form of rising sea levels, more extreme weather events, and the loss of biodiversity.

The Navy can play a vital role in halting climate change. The Navy's ships and aircraft can be used to monitor the environment, conduct research, and deploy clean energy technologies. The Navy can also provide support to other countries that are working to address climate change.

A Blueprint for the Navy

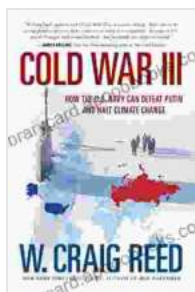

In his book, Mabus provides a detailed blueprint for how the Navy can defeat Putin and halt climate change. He calls for the Navy to invest in new ships, submarines, and aircraft. He also calls for the Navy to develop new technologies, including clean energy technologies.

Mabus's blueprint is ambitious, but it is also necessary. The Navy has a vital role to play in addressing the challenges of the 21st century. The Navy must be ready to defeat Putin and halt climate change.

The Navy is the most powerful naval force in the world. It has a long and proud history of defending our country and our allies. But the Navy is facing new challenges, including the rise of Russia and China, and the growing threat of climate change.
