English Language Teaching in Japan as a Localized Pedagogy: The Implications of the World Englishes Perspective

Saran SHIROZA

English language teaching (ELT) practice in Japan has almost invariably been on the defensive, criticized from both inside and outside of the country for its Anglo-American, native-speaker-centered textbooks, persistence in *rote* or translation-based methods, reportedly less-qualified teachers, and other reasons. Increasing recognition of the term 'world Englishes' (WE) in recent years has provided yet another ground for those calling for an overhaul of the materials, teaching personnel, and pedagogy. With its emphasis on recognizing the validity and legitimacy of varieties of English around the world, WE challenges the longstanding tradition of Japan's ELT, which almost exclusively focuses on the native-speaker (or more precisely, American, model) and gives scant attention to users and the use of English elsewhere.

Such criticism, however, seems to disregard an important fact of ELT in Japan: that there are a plethora of teaching materials produced locally, teaching personnel educated and trained locally, and teaching methodologies developed locally. In other words, the appropriation and localization of ELT, which the framework of WE aims at, seems to have already been achieved to the extent that the local culture and language are well involved in the teaching practice. In light of this concern, this paper, after briefly reviewing the theoretical framework of WE, critically examines the pedagogical implications of the WE framework for ELT in general and in Japan in particular, analyzing the viability and scope of the proposed options for incorporating the WE perspective into ELT in the Japanese context will reveal that many of the proposals seem to regard the concept merely as further support for the increasingly popularized com-

Navigating Cultural Considerations

Cultural sensitivity is paramount in the context of teaching English at Japanese universities. The handbook provides an in-depth exploration of the cultural factors that influence student learning, such as politeness norms, communication styles, and educational expectations. By understanding these cultural nuances, educators can adapt their teaching approaches, create inclusive learning environments, and foster meaningful cross-cultural exchange.
