David Dobbs' "Qualitative Research For Beginners" introduces an array of qualitative research methods, each with its own strengths and applications.

- **Ethnography:** An immersive approach that involves extended observation and participation within a specific cultural setting.
- **Interviews:** In-depth conversations with individuals or small groups, designed to elicit personal narratives and insights.
- **Focus Groups:** Structured discussions involving a small number of participants, facilitating group dynamics and shared perspectives.
- **Grounded Theory:** A systematic method for developing theories and explanations based on data collected through interviews and observations.

The choice of method depends on the research question, the nature of the study, and the accessibility of participants.
